Overview

IO-Link devices

Universal, smart and easy

The use of fieldbus and manufacturer independent IO-Link communication protocols have significantly increased the visibility of processes, thanks to the full access to IO-Link device parameters, diagnostics and process data from the controller. Carlo Gavazzi IO-Link solution provides new ways of accessing, communicating, and processing data, with continuous, and extensive feedback on machine status.

IO-Link, The "USB interface" for sensors and actuators

Universal, worldwide recognized open industrial communication protocol (IEC 61131-9), allows IO-Link enabled devices to exchange process values, parameters or diagnostic messages, via the standard unshielded 3-wire industrial cables.

Centralised configuration and data management

IO-link enables fast configuration and dynamic changes to the sensor's parameters on the fly, which considerably increases the flexibility and diversity of the installation.

Automatic device reconfiguration

In case of device failure the IO-Link Master will automatically check if the new connected device is the right one and re-configure it with the same parameters stored for the old device, preventing incorrect settings.

Simplified maintenance

Thanks to IO-Link, travelling time to reach the plant and stop the machine is no longer necessary. For devices located in a remote area with difficult access, detailed diagnostics and parameter adjustment is now available from any location.

Drive predictive maintenance

IO-Link devices continuously deliver data on their condition and help to predict when a machine needs repair or the replacement of parts. Instead of unnecessary, frequent preventive maintenance, service is need-based reducing machine downtime and maintenance cost.

Capacitive, inductive and photoelectric sensors

Our sensors combine their excellent features with the benefits of the IO-Link standard. Unlimited combinations of functions are now available from output configurations to customized sensing distance and advanced sensing modes. Integrated logging functions of operational hours and power cycles offer advanced diagnostics mechanisms to make both real-time and historic data available. Advanced parameters such as Quality of Run, give an indication of the actual sensing performance of the sensor and help to avoid unplanned interruption of the machines.

Y series DIN-rail and Machine mount IO-Link Masters

The IO-Link Masters allow connection to up to 8 smart devices to the higher-level control system and support the industry's leading Ethernet protocols, such as EtherNet/IP™, PROFINET IO, and MODBUS TCP.

Thanks to the on-board OPC UA server, which runs in parallel without interfering with the main control system, it is possible to simultaneously access the data of the attached smart devices from cloud-based applications via OPC UA clients. The integrated web server and IODD interpreter allow workers to easily configure and access diagnostic information of the IO-Link master and attached devices via a web browser, also remotely from PC or tablets.

SCTL-55 smart configurator, industry 4.0 in your hand

The SCTL-55 is the first and most innovative handheld, self-powered and user-friendly device for identification, configuration, and diagnostics of IO-Link sensors and actuators without the need of any additional hardware or dedicated software.

After plugging in the sensor to one of the integrated M12 or M8 connectors, it will automatically download the IODD file, through Wi-Fi and display all data immediately. Through a 5.5" HD touchscreen display and user-friendly interface the user can view, modify, and optimize even the most complex device very quickly.

IO-Link devices

Feature by family

Overview

IO-Link devices

	IO-Link masters	Smart configurator
		
Family	YN115 - DIN rail control cabinet	YL212 - Machine mounting
Supply	Push-in or screw terminal connector	M12 L-Coded power connector
User interface	Integrated web server accessible via browser	Integrated web server accessible via browser
Connection	8 IO-Link outputs, 2 Ethernet ports	8 IO-Link outputs, 2 Ethernet ports
Communication & protocols	EtherNet/IP™ or PROFINET IO, Modbus TCP	EtherNet/IP™ or PROFINET IO, Modbus TCP
Material	Plastic	Plastic
Degree of protection	IP20	IP67
Operating temperature	-40°C ... +70°C (-40°F ... +158°F)	-25°C ... +60°C (-13°F ... 140°F)
Approvals / Certifications	CE - cULus - FCC	CE - cULus - FCC
Main feature	Simultaneous access to smart devices attached from cloud-based applications via OPC UA clients and from standard industrial machine control systems	Dedicated Apps for easy parameterization and advanced diagnostics of the connected device
	YN115CEI8RPIO	YL212CEI8M1IO
	YN115CPN8RPIO	YL212CPN8M1IO
	Photoelectric Time of Flight (ToF) sensors	
	Inductive proximity sensors M5-DC - 3-wire	

				
Family	LD30E - Stainless steel	LD30C - ABS	IBS04 - Flush mountable	ICS05 - Flush mountable
Sensing distance, Sn	1000 mm	1000 mm	1.3 mm	M5 x 38.2 mm
Range	Adj. 50 ... 1000 mm	Adj. 50 ... 1000 mm	Adj. 0.8 / 1.3 mm	Adj. 0.8 / 1.3 mm
Connection	M8-plug 4 pin or 2m PVC cable	M8-plug 4-pin or 2m PVC cable	M8-plug 3-pin or 2m PVC cable	M8-plug 3-pin or 2m PVC cable
Housing / Cable / Plug	11 x 21 x 31.4 mm	10.8 x 20 x 30 mm	Ø4 x 28.2 mm Ø4 x 38.2 mm	M5 x 28.2 mm M5 x 38.2 mm
Material	Stainless Steel AISI316L	ABS	Stainless steel AISI304	Stainless steel AISI304

Operating temperature	-25°C ... +50°C (-13°F ... +122°F)	-25°C ... +50°C (-13°F ... +122°F)	-25°C ... +80°C (-13°C ... +176°F)	-25°C ... +80°C (-13°F ... +176°F)
Approvals / Certifications	CE - cULus - ECOLAB	CE - cULus	CE - UL - CSA	CE - UL - CSA
Main feature	Infrared Laser class 1, Background Suppression; Time of Flight sensor; Time delay; Logic- and Logging functions; External input; Configurable outputs		Configurable smart sensors; Adjustable Sn, Hysteresis and Switchpoint mode; Time delay; Frequency mode; Divider function; Temperature alarms	
Cable	LD30ETBI10BPA2IO	LD30CTBI10BPA2IO	IBS04SF15A2IO	ICS05S23F15A2IO
Plug	LD30ETBI10BPM5IO	LD30CTBI10BPM5IO	IBS04SF15M5IO	ICS05S23F15M5IO

	Inductive proximity sensors M8-DC - 3-wire
	
Family	ICS08 - Flush mountable
Sensing distance, Sn	2 mm
Range	Adj. 1 / 2 mm
Connection	M8-plug 3-pin or 2m PVC cable
Housing / Cable / Plug	M8 x 31 mm M8 x 40 mm
Material	Stainless steel AISI304
Degree of protection	IP67
Operating temperature	-25°C ... +80°C (-13°F ... +176°F)
Approvals / Certifications	CE - UL - CSA
Main feature	Configurable smart sensors; Presence or Frequency Detection mode; Switchpoint mode: Single Point, Two Point or Window; Time delay: ON, OFF, One shot; Output: NPN, PNP or Push-Pull, NO or NC; Sn: configurable; Hysteresis: standard or extended; Divider function; Temperature alarm
Cable	ICS08S30F20A2IO
Plug	ICS08S30F20M5IO
	ICS08 - Non-flush mountable
	
Family	ICS08 - Non-flush mountable
Sensing distance, Sn	2 mm
Range	Adj. 1 / 2 mm
Connection	M8-plug 3-pin or 2m PVC cable
Housing / Cable / Plug	M8 x 46 mm M8 x 55 mm
Material	Stainless steel AISI304
Degree of protection	IP67
Operating temperature	-25°C ... +80°C (-13°F ... +176°F)
Approvals / Certifications	CE - UL - CSA
Main feature	Configurable smart sensors; Presence or Frequency Detection mode; Switchpoint mode: Single Point, Two Point or Window; Time delay: ON, OFF, One shot; Output: NPN, PNP or Push-Pull, NO or NC; Sn: configurable; Hysteresis: standard or extended; Divider function; Temperature alarm
Cable	ICS08L45F20A2IO
Plug	ICS08L45F20M5IO
