MFP is a leader in the fluid power industry specializing in hydraulics, pneumatics, automatic lubrication systems, and electrical automation. Our approach to the market is from a technical, problem solving aspect to best meet our customer's needs. Educating our customers about the advancements in automation technology has become the underlying theme for MFP Automation Engineering and continues to be a source of growth for our company. MFP is looking to hire a dedicated individual to fulfill our Paint Technician position and join the MFP team.

Title: Paint Technician

Status: Full Time exempt/non-exempt

Department: Power Unit Manufacturing

Reports to: Department Team Lead

Purpose of the Position: The Paint Technician provides support to the manufacturing team to complete our custom units and provide detailed quality surfaces for our customers. This team member is responsible for ensuring our customer's expectations are met and exceeded upon delivery of their unit(s).

Job Responsibilities:

- Prepare power units for paint application by taping off critical components, cleaning (DA) ensuring no solvents remain on the surface that may adversely affect the finished product
- Provide detailed documentation regarding customer specifications with some knowledge of reading engineering documents
- Collaborate with other departments regarding job status and understanding customer expectations
- Maintain the professional expectations of the Company in regards to finished paint applications
- Participate in daily, weekly and monthly work-in-process meetings
- Assist Department Team Lead with job staging and estimating time allocation for upcoming jobs

Preferred Qualifications:

- Experience as a painter with custom applications
- Extremely high attention to detail, aesthetics, visual precision and prideful of your work
- Resourceful in regards to paint specifications that include mixing and familiar with a variety of mediums
- Understand safety protocols, PPE requirements and adherence to company policies

- Maintain a equipment and a clean work area
- Ability to stand for long periods of time and drive to complete the job in a timely manner which may require some flexibility in hours
- Excellent communication skills and ability to work well with others
- Some experience with all Microsoft programs
- Strong organizational skills and time management

Critical Competencies:

- Passion to meet our customer's expectations with quality workmanship
- Must be able to obtain forklift license upon hire

Supervisory Responsibility: None

Working Conditions: Paint booth and manufacturing floor; must be able to stand, bend, lift without limitations; steady hand for paint application(s)
