

BASIC

INDUSTRIAL HYDRAULIC TRAINING

SEPTEMBER 13TH, 2021

Participants: maintenance, sales, engineering, or non-engineering personnel, anyone interested in increasing basic hydraulic knowledge

Objectives: learn where and why hydraulics are used in industrial machinery, understand how hydraulic systems and components work, read and draw hydraulic schematics, transfer information from a hydraulic schematic to an actual application. Basic training.

Content: hydraulic transmission of force and energy, hydraulic fluids, actuators, and pumps, control of hydraulic energy, flow control valves, filtration, hydraulic circuitry, hands-on experience with hydraulic power units

Online tutorial option may be available by the end of 2021 for purchase!

DURATION

Mondays 5:30- 7:30pm
Starting Sept. 13th.
5 weeks total:
Sept. 13, 20, 27,
Oct. 4, & 11

FEE

\$365 (Includes
textbook &
materials)
