

Mobile lubrication solutions for: On-road trucks, paving equipment, forestry equipment, trenchers, loaders, crushers, screens, conveyors, ready mix trucks, cement pumpers, recyclers, backhoes, haul trucks, excavators, graders, scrapers, dozers, drills (horizontal & vertical), tool carriers, skid steers, planers, soil stabilizers, telebelts, compactors, refuse trucks, boom pumps, pavers, hammers, pulverizers, shears, grapples, fleet services, rail services, snow plows and more!

MFP Mobile Lubrication Systems

The right lubricant, in the right quantity, at the right time, to the right lubrication point. **That's our promise!**

- ✓ On-Road / Off-Road Lubrication
- ✓ Fluid Dispensing Systems
- ✓ Fire Suppression Systems

mifp.com ☎ 616-538-5700

Top quality mobile lubrication systems, products and services to help reduce cost and increase productivity

- ✓ System Design
- ✓ Installation
- ✓ Service & Repair
- ✓ Lubrication Tools & Equipment

Equipment lubrication challenges cost money and time in unscheduled maintenance, equipment repairs, reduced output and decreased efficiency.

MFP has been supplying lubrication systems for on-and-off road mobile equipment for over 30 years to deliver the right amount of lubrication, at the correct time, for optimal performance. We even offer automated lubrication options that eliminate the need for repetitive manual spot lubrication.

We are also your one-stop shop for service and parts for automatic lubrication systems covering most leading brands. We keep hundreds of parts in stock to get you back up and running as soon as possible.

Plus, our installation and service trucks have everything required to handle a complete installation or service call, whether the installation takes place at a maintenance garage or at a job site.

FIRE SUPPRESSION

MFP Automation Engineering works on site to install service and maintain your fire suppression system to keep you up to code with our certified technicians.

The benefits of mobile lubrication systems, products & services

Maintenance Benefits

- Reduces labor time and costs
- Extends time between repair intervals
- Prevents over-and-under greasing

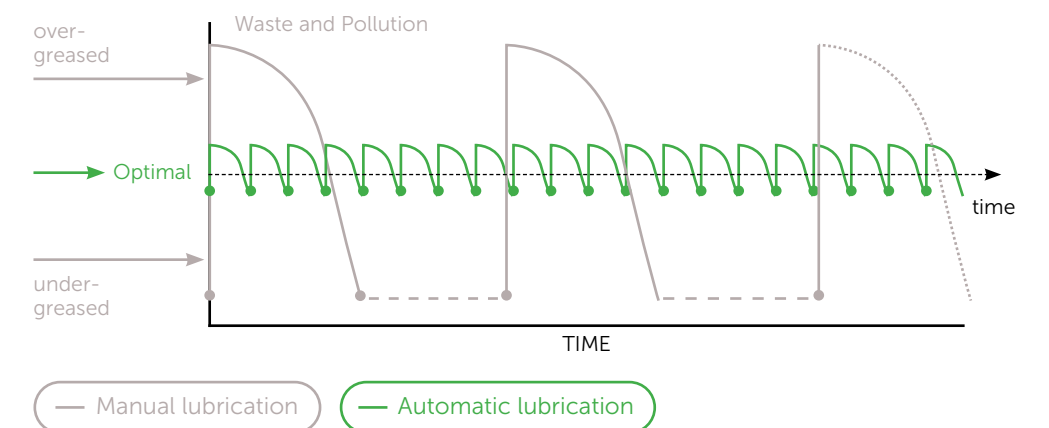

Operational Benefits

- Up to 50% savings in lubricant costs due to accurate timing and dosing of lubricants
- Fewer shutdowns and unplanned production losses
- Increases equipment reliability and improves profitability

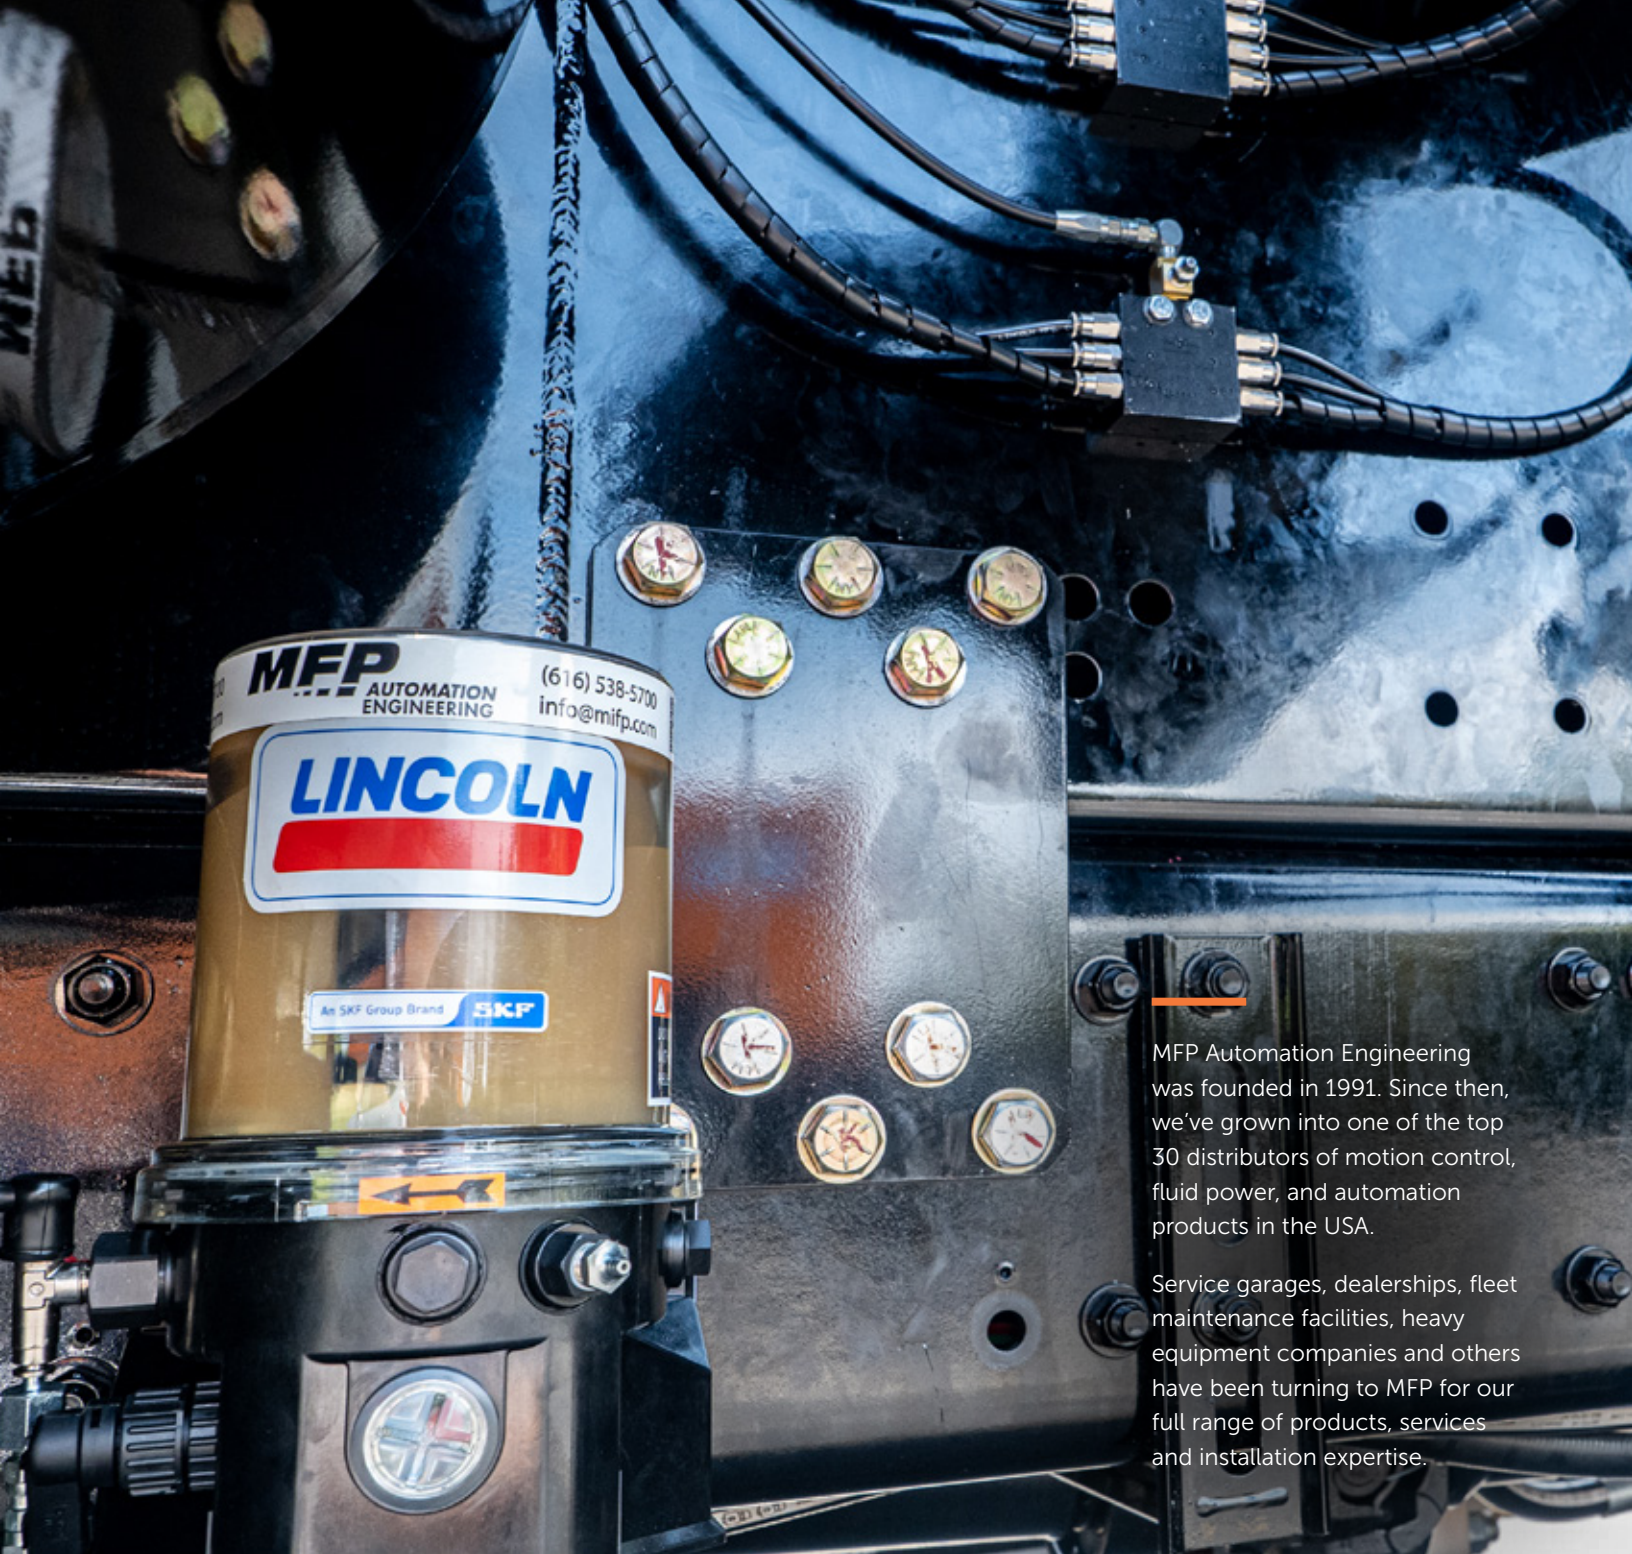

Safety & Environmental Benefits

- Reduced environmental impact
- Eliminates manual lubrication of dangerous, difficult-to-access points
- Reduces risk of slips and falls through precision lubrication

Automatic vs. Manual lubrication

Manual lubrication typical results in over-or-under lubricating. Automatic lubrication delivers a consistent amount for optimal machine performance.

MFP Automation Engineering was founded in 1991. Since then, we've grown into one of the top 30 distributors of motion control, fluid power, and automation products in the USA.

Service garages, dealerships, fleet maintenance facilities, heavy equipment companies and others have been turning to MFP for our full range of products, services and installation expertise.
