

ADVANCED

INDUSTRIAL HYDRAULIC TRAINING

FEBRUARY 21ST, 2023

Participants: maintenance, sales, engineering, or non-engineering personnel, anyone interested in increasing basic hydraulic knowledge

Objectives: learn why hydraulic circuits are used on industrial machines, further understanding of hydraulic components and how they operate, specify hydraulic components, and design and efficient hydraulic system

Content: pump controls, proportional valves for pressure & directional control, circuit design, troubleshooting, hands on experience with hydraulic power units

**Online tutorial option may be available by the end of 2023 for purchase! **

DURATION

Tuesdays from
5:30 - 7:30 pm Starting
Feb. 21.

4 weeks total:
Feb. 21, 28, Mar. 7, &
14.

FEE

\$515 (Includes
textbook &
materials)
