

BASIC

INDUSTRIAL HYDRAULIC TRAINING

FEBRUARY 19, 2024

Participants: maintenance, sales, engineering, or non-engineering personnel, anyone interested in increasing basic hydraulic knowledge

Objectives: learn where and why hydraulics are used in industrial machinery, understand how hydraulic systems and components work, read and draw hydraulic schematics, transfer information from a hydraulic schematic to an actual application. Basic training.

Content: hydraulic transmission of force and energy, hydraulic fluids, actuators, and pumps, control of hydraulic energy, flow control valves, filtration, hydraulic circuitry, hands-on experience with hydraulic power units

Online tutorial option may be available by the end of 2023 for purchase!

DURATION

Mondays 5:30- 7:30pm
Starting Feb. 19th.
5 weeks total:
Feb. 19, 26,
March 4, 11, & 18

FEE

\$365 (Includes
textbook &
materials)

*Payment due prior to start
of first class.
